

References

We value our cities
and so we constantly
endeavour to make
them beautiful
wherever they
may be.

city

City public spaces are fascinating places where people meet history. We are really pleased that our design is directed towards something as interesting as urban areas. We can offer all citizens fine quality and influence their taste without any exclusivity. Indisputable equality. For mmicité, making street furniture is nothing less than a cultural mission. We can change the face of cities by installing just a few small elements.

activity

mmicité is not only a supplier of high-quality street furniture, our company is also a partner to all those who want to create something special within public spaces. Mayors of cities of all sizes in the mountains or coastal areas, architects of small teams and large design institutions, construction companies of local or transnational importance – we address all of them with the aim of achieving the perfect project.

design

At the beginning, there is always a designer sketch, a mere intention. The strong team of experienced and educated professionals create strong, high-quality products. Efficient functionality, careful processing and affordable cost are the main parameters that we monitor throughout the process. Modern design and distinctive expression represent a constant standard of mmicité.

quality

We combine the very best materials, which are further continuously tested. We draw from two sources; on the one hand, from the years of our experience, on the other, from constant efforts to upgrade the materials. Only the best will pass through a sieve. Function, durability and of course price are what matter most.
